Complementing CDT with UAE-Ready PQC Assessment Engine

Why This Matters Now

- UAE National Encryption Policy 2025 mandates PQC migration plans by end-2026
- IA V2 (2024) requires Kyber/Dilithium for key exchange/signatures
- ADGM/DFSA entities must submit regulator-ready migration plans
- **Pain Point:** Financial firms lack quantum-risk visibility & compliance evidence

Our Solution: PQC Assessment Engine

- **Open-core:** @taurus/pqc-crypto (Kyber/Dilithium) + Heiro LF audit trail
- **Output:** Regulator-ready PDF gap analysis + migration roadmap
- **Deployment:** Docker-compose on client infra (zero licensing friction)
- **Complement:** Adds formal PQC migration evidence to QuantumGate's CDT

Value Proposition for QuantumGate

1. **Enhance CDT Offering:** PQC module addresses emerging regulator mandate
2. **Accelerate Adoption:** Early UAE fintechs in CDT sandbox need compliance proof
3. **Strengthen National Alignment:** Direct support for UAE Cybersecurity Council & National PQC Migration Program
4. **Revenue Share:** Pilot-to-paid conversion (\$2.5K/entity assessment + \$500/yr updates)

Pilot Proposal

- **Target:** 2-3 ADGM RegLab or DIFC FinTech Accelerator fintechs
- **Offer:** Free PQC assessment + regulator-ready report
- **Ask:** Warm intro to UAE Cybersecurity Council
OR CDT onboarding clients
- **Outcome:** Testimonial + validation of report acceptability by regulators

Next Steps

1. **This Week:** 15-min call to align on pilot parameters
2. **Week 2:** Kickoff with selected fintech(s)
3. **Week 3:** Assessment execution & report delivery
4. **Week 4:** Feedback collection & paid conversion discussion
