

**Taurus AI x
Muthoot
FinCorp**

AI-Powered Micro-loan Repayment Optimization

Why This Matters Now

- Muthoot FinCorp serves millions of micro-business traders, hoteliers, grocers
- Daily/weekly micro-loan repayments cause cash-flow stress for borrowers
- High collection costs and missed payments impact portfolio health
- **Pain Point:** Borrowers struggle to align repayments with irregular cash inflows

Our Solution: Cash-Flow AI Agent

- **AI Model:** Ollama qwen3-coder:latest (fine-tuned on synthetic repayment patterns)
- **Output:** Personalized SMS/WhatsApp reminders & repayment suggestions
- **Deployment:** Docker-compose with SQLite (zero licensing, on-prem or cloud)
- **Integration:** API or CSV exchange for borrower data & repayment status

Value Proposition for Muthoot FinCorp

1. **Reduce Collection Costs:** Automated, timely reminders reduce manual follow-ups
2. **Improve On-time Payments:** Align reminders with borrower cash-flow patterns
3. **Enhance Borrower Experience:** Personalized, non-intrusive communication
4. **Data-Driven Insights:** Dashboard shows predicted vs actual payment rates

Pilot Proposal

- **Target:** Head of Retail Lending (via Praveen Varkey introduction)
- **Offer:** Free pilot on 50 active micro-loans (one full repayment cycle)
- **Ask:** Access to anonymized historical data (last 3-6 months) for configuration
- **Outcome:** Testimonial + measurable improvement in on-time payments & reduced collection calls

Expected Impact

- **>15% reduction** in collection calls
- **>10% improvement** in on-time micro-payments
- **Scalable:** \$1,999/month flat OR \$0.15/active loan/month after pilot

Next Steps

1. **This Week:** 15-min call to align on pilot scope & data sharing
2. **Week 2:** Data provision & agent configuration (3-5 days)
3. **Week 3:** Pilot launch & weekly review calls
4. **Week 4:** Performance review & paid conversion discussion
